

BODYSTAT[®] 1500

Body Composition Monitoring Unit

- Single frequency, ideal for adult (from 18 years) assessment.
- Actual results and recommended ranges displayed within seconds on two-line display screen.
- **Wellness** and **Body Manager** optional windows software to download test results and print educational and highly motivational reports including **Cardiac Risk Analysis**; can include **Blood Pressure**, Cholesterol, and much more, to track change over time in graphically presented **Trend Analysis**.
- Comprehensive sample print outs available on web page.

BODYSTAT[®] 1500MDD

Body Composition & Wellness Monitoring Unit

- Dual frequency, ideal for children (from 6 years) & adult assessment.
- Innovative **Wellness Marker™** for overall health assessment.
- Includes **Body Manager** software to print summary reports and trending results.
- Optional **Wellness** software – up to 17 pages of educational measurement data.

QUADSCAN 4000

Body Composition, Fluid & Illness/ Segmental Monitoring Unit

- **Multi-frequency** for the measurement of Extra-Cellular and Total Body Water and Body Cell Mass assessment.
- Unique **Illness Marker™** (whole body and segmental) based on raw Impedance data only, without the need for actual body weight.
- Assesses fluid ratio between **ECW** & **TBW** and cellular health status in healthy people, competitive athletes and in the critically ill.
- Applies to all age groups from neonates to the very elderly and irrespective of population group.
- Includes comprehensive **Body Composition** and **Fluid Analysis** software with alternative predictive equations (sample print-outs available on web page).

BODYSTAT[®] PRINTER

- Portable Thermal Printer fitted with Bluetooth offering immediate off-site print out of test results.
- Battery operated and lightweight.
